Splinter Cell Cheats Pc

Usually, depending on how close you throw it to the enemies, the enemies will immediately be alerted.. Get close to the wall on the left and do a double jump to get on that girder.. The guards will come over, but if not all the guards are there that are in fairly close distance with the camera, then keep making the distracting noise.. When you see an enemy, headshot him with a cam, he'll get knocked down and you'll be able to get the camera back by searching the corpse thus saving you a great deal of ammo.. Just remember that even when the lights are out, you can still be heard, (or seen if you are close enough to a guard) so you still have to creep around, you just don't have to resort to sticking to the shadows now.. The dog will smell you if you wait too long so this was the fastest way to lose the dog I found.. Whenever you see a group of enemies, you will want to ricochet these off of a wall and get it so that it's positioned near the enemies.. Then, turn around and you should see yet another girder Jump on it Directly in front of you should be a medkit and a disposable pick on a well lit platform.. Press Y to release the girder and immediately hold Left Analog-stick Up to grab the next girder down.

Sometimes the guards may just cough a few times, but not get knocked on conscious.. Aim your assault rifle and the table post(make sure the diversion camera is equipped).. When you purchase through links on our site, we may earn an affiliate commission.. Two men will be eating and saying something about a bomb detonating. Then, press Y (then B very quickly if you left the guards in the hall alive) If you have bullets to spare, don't have shooting practice at cans or bottles, shoot out the lights This can come in very handy if you are in a lit area with a lot of guards.

The guards are fairly easy to sneak by in the shadows the dog is your biggest threat.. Inside on the table to the right there is 2 sticky shockers and on the table to the left there is 5 reusable cameras.. GAS GRENADE This is an equivalent of the gas that is in the Distraction Camera Also, instead of spraying in one direction, this is like a gas cloud.. Crouch run past the semi while it is at the gate and hide under the second semi.. Once standing on it, there should be another girder in front of you Jump and get on it.. Wait for the first semi to move and shoot a diversion camera on the side by the rear wheel of the trailer as it passes.. In the levels where you have the cameras in your equipment, you can save a great deal of ammo by using the cameras as a bullet but they are not lethal (handy for the CIA level).
